

**Evaluation Test No. 1**

**1. Which of the following peripheral device is NOT an input device:**

- a) Keyboard
- b) Monitoring
- c) Scanner
- d) Mouse

**2. What type of computer is used as an electronic diary, calendar, pocket calculator?**

- a) laptop
- b) the tower
- c) Palm PC
- d) Supercomputer

**3. Input device that reads printed information from paper and converts it into digital format:**

- a) Bright pencil
- b) Monitor
- c) Scanner
- d) Touch screen

**4. Hard disk capacity is usually measured in:**

- a) bytes
- b) KB
- c) MB
- d) GB

**5. You want to add RAM to a computer. What size would you choose?**

- a) 256 MB
- b) 256 TB
- c) 256 b
- d) 12 b

**6. Hardware represents:**

- a) the physical and technical equipment necessary for data processing
- b) the logical equipment necessary for data processing
- c) all programs, applications used for data processing
- d) the arithmetic and logical devices necessary for data processing

**7. Example of core software:**

- a) word processor
- b) spreadsheet application
- c) operating system
- d) electronic presentations

**8. A computer connected in a network is called?**

- a) processing station
- b) workstation
- c) research station
- d) command station

**9..doc is the file extension created with the application:**

- a) Microsoft Publisher
- b) Microsoft Word
- c) Microsoft Excel
- d) Microsoft PowerPoint

**10. File type used to store images:**

- a) pps
- b) txt
- c) dbf
- d) jpg

**11. Working at home with the help of the computer is called:**

- a) PC working
- b) Teleworking
- c) Networking
- d) Internet working

**12. Computer-aided education is called:**

- a) EAC (Education Aided Computer)
- b) CTB (Computer Testing Basic)
- c) CBT (Computer Basic Training)
- d) CAE (Computer-Aided Education)

**13. Groups of people whose communication is mediated through computers connected to the Internet.**

- a) virtual community
- b) online community
- c) territorial group
- d) administrative group

**14. Component of the virtual community:**

- a) the blog
- b) scanner
- c) the printer
- d) the keyboard

**15. The detection and destruction of viruses is done with the help of:**

- a) an antivirus program
- b) the protective wall
- c) the operating system
- d) children's safety

**16. What software is used for free to test and then purchased by the author?**

- a) shareware
- b) free software
- c) hardware
- d) netware

**17. Which of the following statements is true regarding copyright when distributing a software application:**

- a) the copyright on the application is optional
- b) the copyright on the application is not preserved
- c) the copyright on the application is preserved
- d) copyright lasts only 30 days

**18. RAM means:**

- a) Random Access Memory
- b) Read Access Memory
- c) Random Aleator Memory
- d) Random Access Megabyte

**19. Type of computer that can execute more than 1 billion instructions per second:**

- a) Microcomputer
- b) Minicomputer
- c) Main frame
- d) Supercomputer

**20. Place the storage media in ascending order of memory:**

- a) Floppy disk, CD-ROM, DVD-ROM, Hard Disk
- b) Floppy disk, DVD-ROM, CD-ROM, Hard Disk
- c) Floppy disk, CD-ROM, Hard Disk, DVD-ROM
- d) CD-ROM, DVD-ROM, Hard Disk, Floppy Disk

**21. Peripheral device used especially for printing technical drawings:**

- a) matrix printer
- b) plotter
- c) laser printer
- d) inkjet printer

**22. UCC is a block from the component:**

- a) Monitor
- b) Internal memory
- c) External memory
- d) Central Processing Unit

**23. Which of the following peripheral device is NOT output?**

- a) trackball
- b) plotter
- c) the printer
- d) box

**24. Private network of a company:**

- a) Intranet

- b) Extranet
- c) The Internet
- d) Network

**25. What type of network will a company that has computers located in Bucharest, Brasov and Chisinau use?**

- a) LAN
- b) GAN
- c) Extranet
- d) WAN

**26..mdb is the extension of the files created with the application:**

- a) Microsoft Access
- b) Microsoft Word
- c) Microsoft Excel
- d) Microsoft PowerPoint

**27. What type of software controls the operation of hardware devices?**

- a) application programs
- b) web browser
- c) the operating system
- d) Internet Explorer

**28. Power saving option that allows data to be saved in RAM:**

- a) Stand by
- b) Hibernate
- c) Disconnection
- d) Restart

**29.CAD means:**

- a)Computer Aided Desktop
- b)Computer Auxiliary Design
- c)Computer Access Draw
- d)Computer Aided Design

**30. After every 50 minutes worked in front of the computer, a break of:**

- a) 10 minutes
- b) 5 minutes
- c) 15 minutes
- d) 20 minutes

**31. Electronic communication tool used for sending and receiving letters:**

- a) IM
- b) RSS
- c) Podcast
- d) Electronic mail

**32. Simultaneous communication between users by transmitting information efficiently and quickly with immediate confirmation of receipt or response.**

- a) Instant Messaging

- b) VOIP
- c) Podcast
- d) Email

**33. An antivirus program must be permanently:**

- a) Renamed
- b) Copied
- c) Replaced
- d) Updated

**34. A firewall is used to:**

- a) filtering of data transmissions
- b) deleting viruses
- c) coordinating several computers in order to participate in an attack
- d) to allow access to unauthorized persons

**35. The license grants:**

- a) right to use a software application
- b) right to use a software application and right to sell
- c) right to use a software application and distribution right
- d) right to use hardware equipment

**36. The back-up region term:**

- a) copying the files to the same storage medium in which they were created
- b) copying files to an auxiliary storage medium
- c) the logical deletion of files
- d) physical deletion of files

**Answers**

1	b	10	d	19	d	28	b
2	c	11	b	20	a	29	d
3	c	12	c	21	b	30	a
4	d	13	a	22	d	31	d
5	a	14	a	23	a	32	a
6	a	15	a	24	a	33	d
7	c	16	b	25	d	34	a
8	b	17	c	26	a	35	a
9	b	18	a	27	a	36	b

## Evaluation Test No. 2

**1. To become information, data must go through the following stages:**

- a) introduction, extraction, processing
- b) processing, introduction, extraction
- c) introduction, processing, extraction
- d) extraction, processing, introduction

**2. Input device that can read the text with the help of OCR-type programs:**

- a) scanner
- b) the keyboard
- c) plotter
- d) bright pencil

**3. Choose the correct descending order of multiples of the byte:**

- a) PB, EB, TB, GB, MB, KB
- b) EB, PB, MB, KBTB, GB
- c) EB, PB, TB, GB, MB, KB
- d) GB, MB, KB, EB, PB, TB

**4. Flexible, portable magnetic disk with small storage capacity.**

- a) stick
- b) floppy disk
- c) hard disk
- d) magnetic tape

**5. Choose the correct ascending order of bit multiples:**

- a) word, double word, quadruple word
- b) EB, PB, MB, KB, TB, GB
- c) word, quadruple word, double word
- d) GB, MB, KB, EB, PB, TB

**6. Computer category located between Microcomputer and "mainframe" computer:**

- a) minicomputer
- b) supercomputer
- c) PDA
- d) Notebook

**7. GUI represents:**

- a) Graphical User Interface
- b) Graphical User Internet
- c) Graphical User Intranet
- d) Grade User Interface

**8. Work from home with the help of the computer is called:**

- a) computer working
- b) video conference
- c) PC working
- d) teleworking

**9. Choose the correct order of the stages of creating a program:**

- a) analysis, realization, design, testing, implementation, verification, maintenance
- b) analysis, design, realization, testing, implementation, verification, maintenance
- c) analysis, design, realization, testing, verification, implementation, maintenance
- d) analysis, testing, design, realization, implementation, verification, maintenance

**10. Extension of the Intranet network for communication with other institutions:**

- a) Extranet
- b) Intranet
- c) Internet
- d) Network

**11. Buying products using the Internet:**

- a) e-banking
- b) e-shopping
- c) e-commerce
- d) e-health

**12. Energy saving option that allows data to be saved to a temporary file on the hard disk:**

- a) Hibernate
- b) Stand By
- c) Restart
- d) Turn Off

**13. RSS means:**

- a) Really Simple Syndication
- b) Relatively Simple Syndication
- c) Really Site Syndication
- d) Relative Site Syndication

**14. Technology used to automatically track changes within the site, without the need to access the site:**

- a) RSS
- b) SRR
- c) RSR
- d) RISK

**15. A virus is a:**

- a) program
- b) peripheral device
- c) storage medium
- d) network equipment

**16. Software that can be downloaded and used for free is called:**

- a) Freeware
- b) Shareware
- c) Freesoft
- d) Sharesoft

**17. Which of the following statements is true? regarding copyright rights when distributing a program (software) on CD:**

- a) the right to authorship over a program is not preserved
- b) the copyright on a program is preserved
- c) the copyright on a program retains only part of its rights
- d) the copyright on a program is kept only for a specified period of time

**18. A computer virus represents:**

- a) an anti-fraud program
- b) a program created with a destructive purpose
- c) an antivirus program
- d) a security program for existing data in personal computers

**19. Volatile memory, which loses its content when the computer is turned off:**

- a) ROM
- b) EPROM
- c) EEPROM
- d) RAM

**20. The "brain" of the computer is:**

- a) RAM memory
- b) the microprocessor
- c) ROM memory
- d) the plotter

**21. The capacity of a floppy disk is:**

- a) 1.44 MB
- b) 1.44 GB
- c) 1.44 TB
- d) 1.44 KB

**22. Peripheral device that prints characters by spraying ink through special nozzles:**

- a) matrix printer
- b) plotter
- c) inkjet printer
- d) laser printer

**23. Which of the following devices is used to store data?**

- a) stick
- b) plotter
- c) printer
- d) microphone

**24. Peripheral input-output device:**

- a) the luminous pencil
- b) rolling ball
- c) modem
- d) the tracer

**25. Network topology in which each computer is linked to a central unit:**

- a) ring
- b) hierarchical
- c) highway
- d) star

**26. The last stage in the realization of a program is:**

- a) maintenance
- b) implementation
- c) verification
- d) testing

**27. Internet service that allows working with documents in HTML format:**

- a) www
- b) chat
- c) newsgroup
- d) ftp

**28. Device that allows PCs to send information over long distances using telephone lines.**

- a) PDA
- b) plotter
- c) printer
- d) modem

**29. What is the best way to get rid of obsolete computer components:**

- a) destruction
- b) throwing
- c) the sale of parts
- d) recycling of components

**30. RSI means:**

- a) Right Strain Injury
- b) Repetitive Strain Injury
- c) Repetitive Strain Memory
- d) Role Strain Memory

**31. A blog is:**

- a) log on the Internet
- b) notebook diary
- c) a storage device
- d) a navigation device

**32. Technology that allows you to automatically download the latest audio/video programs offered on a certain site:**

- a) RSS
- b) RISK
- c) podcast
- d) CISC

**33.Firewall means:**

- a) Protection wall
- b) Protective wall
- c) Protection dyke
- d) Protection door

**34. The acronym EULA stands for:**

- a) Every User License Agreement
- b) End user License Assessment
- c) End User License Agreement
- d) Every User License Assessment

**35. Which option would you choose for the security of the data on your computer?**

- a) using an updated antivirus program
- b) using an anti-virus program that is not updated
- c) installation of at least three antivirus programs
- d) installing as many antivirus programs as possible

**36.Which of the statements describes a good password security policy:**

- a) passwords are kept in electronic directories
- b) passwords contain the user's first name
- c) passwords are changed periodically
- d) passwords are shared with friends

**Answers**

1	c	10	a	19	a	28	d
2	a	11	b	20	b	29	d
3	a	12	a	21	a	30	b
4	b	13	a	22	c	31	a
5	a	14	a	23	a	32	c
6	b	15	a	24	c	33	a
7	a	16	a	25	d	34	c
8	d	17	b	26	a	35	a
9	b	18	b	27	d	36	c

## Evaluation Test No. 3

### 1. Peripheral input-output device:

- a) touchscreen
- b) scanner
- c) PDA
- d) Organizer

### 2. Portable computer, built for use outside the office:

- a) desktop
- b) laptop
- c) minicomputer
- d) supercomputer

### 3. Component block of the Central Processing Unit:

- a) ULA (Unit Logic Arithmetic)
- b) ALU (Arithmetic Logic Unit)
- c) OAL (Or Arithmetic Logic)
- d) UAL (Unic Arithmetic Logic)

### 4. How many bits does a byte contain?

- a) 4
- b) 8
- c) 32
- d) 1

### 5. The speed of a printer is expressed in:

- a) cps
- b) cpm
- c) ppc
- d) sec

### 6. Device that converts the analog signal into a digital signal:

- a) power source
- b) modem
- c) processor
- d) cache memory

### 7. WWW stands for:

- a) Windows Wide Web
- b) World Wide Web
- c) Word Wide Web
- d) Word Windows Web

### 8. ADSL means:

- a) Active Digital Subscriber Line
- b) Asymmetric Dynamic Subscriber Line
- c) Asymmetric Digital Subscriber Line
- d) Active Dynamic Substitute Line

**9. Internet service used for sending and receiving messages in electronic format.**

- a) newsgroups
- b) chat
- c) ftp
- d) email

**10. The Internet is:**

- a) a local computer network
- b) a global network of computers
- c) an extensive network of computers
- d) a metropolitan network of computers

**11. After every 50 minutes of working in front of the computer, a break of:**

- a) 10 minutes
- b) 5 minutes
- c) 15 minutes
- d) 20 minutes

**12. The files must be saved:**

- a) annually
- b) regularly
- c) monthly
- d) weekly

**13. RSS means:**

- a) Rich Site Summary
- b) Right Site Summary
- c) Rich Summary System
- d) Rich Server Summary

**14. Technology that allows ordinary phone calls, voice packets being transmitted via the Internet, not via telephone cables or mobile phone networks:**

- a) VIOP
- b) VOIP
- c) Telnet
- d) RSS

**15. Which of the following is NOT a function specific to the operating system:**

- a) detection of viruses
- b) resource management
- c) folder management
- d) file management

**16. The EULA term is displayed:**

- a) when uninstalling an application
- b) when installing a new application
- c) when sending a message using electronic mail
- d) when opening an application

**17. The right to use a software can be obtained by purchasing:**

- a) hardware devices
- b) personal computer
- c) copyright
- d) license

**18. Viruses CANNOT be transmitted through:**

- a) the global computer network
- b) local computer network
- c) sending an electronic message
- d) installing a new power source

**19. What is the best storage medium to record a movie?**

- a) CD
- b) DVD
- c) USB stick
- d) PDA

**20. CPU speed is measured in:**

- a) DB
- b) MB
- c) m/s
- d) Ghz

**21.1 KB contains:**

- a) 1000 bits
- b) 1000 bytes
- c) 1024 bits
- d) 1024 bytes

**22. What storage medium is used to store music albums?**

- a) CD
- b) DVD
- c) stick
- d) Zip disk

**23. When opening the computer, the operating system loads in:**

- a) RAM memory
- b) processor
- c) radiator-fan assembly
- d) ROM memory

**24. The information system represents:**

- a) the set of technical and physical devices necessary for data processing
- b) the set of information flows that ensure the link between the management system and the execution system
- c) the set of software programs
- d) software programs and the hardware part of an IT system

**25. Which of the following is an example of software?**

- a) PDA
- b) operating system
- c) USB stick
- d) hard disk

**26. Does not represent an operating system:**

- a) Microsoft Word
- b) Linux
- c) Windows
- d) MacOS

**27. HTML means:**

- a) Hyper Text Markup Language
- b) Hyper Text Modem Language
- c) Hyper Text More Language
- d) Hyper Total Markup Language

**28. Terminal that does not contain its own processing capacity:**

- a) unintelligent
- b) intelligent
- c) microprocessor
- d) minicomputer

**29. The elements that lead to the creation of a healthy work environment are called rules of:**

- a) economy
- b) ergonomics
- c) personal care
- d) medical assistance

**30. Mode of communication and sending messages using the Internet:**

- a) e-learning
- b) e-commerce
- c) teleworking
- d) email

**31. Application used for instant messaging:**

- a) Email
- b) RSS
- c) Yahoo! Mail
- d) Yahoo! Messenger

**32.IM represents:**

- a) Instant Memory
- b) Instant Messaging
- c) Instant Mail
- d) Internet Mail

**33. Most computers are operated with a mouse and using a graphic interface with icons. What is this called?**

- a) Global User Interface
- b) Global Uniform Interface
- c) Graphical User Interface
- d) Graphical Universal Interface

**34. The computers in an office building are connected so that staff in the building can share files and printers. How is the name at this arrangement of computers?**

- a) ADSL
- b) LAN
- c) WAN
- d) ISDN

**35. Which of the following statements about teleworking is usually true:**

- a) It reduces or eliminates the transition time between different activities
- b) It promotes more interpersonal contact and work team
- c) It does not allow for more flexible work
- d) There is no reduction in office space

**36. What does it mean CBT?**

- a) Computer Based Template
- b) Computer Based Techniques
- c) Computer Based Training
- d) Computer Based Task

**Answers**

1	a	10	b	19	b	28	a
2	b	11	a	20	d	29	b
3	b	12	b	21	d	30	d
4	b	13	a	22	a	31	d
5	a	14	b	23	d	32	b
6	b	15	a	24	b	33	c
7	b	16	b	25	b	34	b
8	c	17	d	26	a	35	a
9	b	18	d	27	a	36	c

## Evaluation Test No. 4

**1. Which of the following devices is not an output peripheral:**

- a) the keyboard
- b) monitor
- c) the printer
- d) speakers

**2. RAM is usually measured in:**

- a) KB
- b) GB
- c) TB
- d) MB

**3. Data storage medium with the smallest storage capacity:**

- a) floppy disk
- b) stick
- c) Zip disk
- d) Jazz disc

**4. Adding new RAM memory modules leads to:**

- a) increasing the performance of the computing system
- b) decrease in the performance of the computing system
- c) increasing the capacity of the external memory
- d) decrease in external memory capacity

**5. How many CDs with a capacity of 700 MB are needed to store 80 GB:**

- a) 118
- b) 117
- c) 8
- d) 70

**6. Device used to enter a photo into the computer:**

- a) scanner
- b) joystick
- c) the keyboard
- d) monitor

**7. A network that connects computers at the level of a building is called:**

- a) MAN
- b) GAN
- c) WAN
- d) LAN

**8. PSTN means:**

- a) Private Switched Telex Network
- b) Public Switched Telex Network
- c) Private Switched Telephone Network
- d) Public Switched Telephone Network

**9. Set of rules used by computers in the network for communication:**

- a) dictionary
- b) protocol
- c) regulation
- d) agenda

**10. Which of the following programs are designed to solve specific problems of an application?**

- a) Word, Excel, Access
- b) Word, Linux, PowerPoint
- c) Publisher, Windows XP, Excel
- d) Access, Windows Me, Word

**11. UPS means:**

- a) Uninterruptible Power Supply
- b) Universal Power Scheme
- c) Universal Power Source
- d) Uninterruptible Power Scheme

**12. The electronic voting concept is specific to the service:**

- a) e-education
- b) e-commerce
- c) e-mail
- d) e-government

**13. Electronic mail application:**

- a) Microsoft Outlook Express
- b) Yahoo! Messenger
- c) Microsoft Publisher
- d) Microsoft Excel

**14. To make VoIP calls it is necessary:**

- a) broadband Internet connection
- b) speakers
- c) printer
- d) dial-up Internet connection

**15. To update an antivirus program:**

- a) to detect newly appeared viruses
- b) to prevent the deletion of files
- c) to slow down the work speed
- d) to increase work speed

**16. Starting the operation of checking disk units with an antivirus program is called:**

- a) Scan
- b) Report
- c) Delete
- d) Rename

**17. Which of the following is a high speed communication technology?**

- a. CBT (Computer Based Training)
- b. ADSL (Asymmetric Digital Subscriber Line )
- c. WWW (World Wide Web)
- d. PDA ( Personal Digital Assistant)

**18. Data security measures can be taken at the level:**

- a) hardware and software
- b) hardware
- c) software
- d) physical

**19. Peripheral device used especially for computer games.**

- a) scanner
- b) joystick
- c) printer
- d) touch screen

**20. A peripheral device represents:**

- a) a hardware component
- b) a software component
- c) an application program
- d) a utility program

**21. The smallest unit of measurement of memory is called:**

- a) bytes
- b) bit
- c) "zero"
- d) null

**22. The processor is also known as:**

- a) the "heart" of the computer
- b) storage medium
- c) centering device
- d) the "brain" of the computer

**23. Which of the following components is considered a hardware element:**

- a) the monitor
- b) file
- c) folder
- d) the character

**24. What device would you use to transfer data from one computer to another?**

- a) stick
- b) hard disk
- c) power source
- d) processor

**25. Spreadsheet software application:**

- a) Windows XP
- b) Paint
- c) Microsoft Excel
- d) Microsoft Word

**26. Type of network in which all computers are connected to the data bus:**

- a) highway
- b) star
- c) ring
- d) hierarchical

**27. The World Wide Web represents:**

- a) search engine
- b) an Internet service
- c) multimedia application
- d) operating system

**28. What type of software manages computer system resources?**

- a) peripheral devices
- b) the operating system
- c) application programs
- d) the microprocessor

**29. Which of the following functions belongs to an operating system?**

- a) Preparation of reports, letters and spreadsheets
- b) Controlling the hardware resources of a computers.
- c) Digital to analog signal conversion and vice versa
- d) Performing financial calculations

**30. The safety term refers to:**

- a) the person who uses the computer and the data being processed
- b) the person who uses the computer
- c) the data being processed
- d) computer

**31. XML file, which describes the content of a site, being updated with it:**

- a) RSS
- b) website
- c) blog
- d) diary

**32. All blogs and blog authors are called:**

- a) blogosphere
- b) logosphere
- c) totalblog
- d) blog

**33. In a computer network the virus can be introduced:**

- a) from any point of the network
- b) only by sending an e-mail
- c) only through a single computer terminal
- d) only from the network server

**34. What is the first rule you must follow when you suspect the existence of a virus?**

- a) keep calm
- b) panic
- c) delete all files that seem suspicious to you
- d) format the computer urgently

**35. Self-replicating programs harmful to computer networks:**

- a) the Trojans
- b) worms
- c) macro viruses
- d) viruses

**36. Programs written with the aim of causing damage to personal computers, sent by attackers:**

- a) worms
- b) worms
- c) antivirus programs
- d) viruses

### Answers

1	b	10	a	19	b	28	b
2	d	11	a	20	a	29	b
3	a	12	d	21	b	30	a

8	d	17	b	26	a	35	d
9	b	18	a	27	b	36	d

## Evaluation Test No. 5

**1. Which input device can be considered a mouse sitting on its back?**

- a) trackball
- b) joystick
- c) bright pencil
- d) microphone

**2. Why is a floppy disk formatted?**

- a) to be compatible with the operating system
- b) checking and marking defective areas
- c) deletion of data
- d) all the above operations

**3. UCP speed is measured in:**

- a) milliseconds
- b) second
- c) decibels
- d) Mhz

**4. Random Access Memory is:**

- a) a component of the ROM memory
- b) a ROM memory extension
- c) an external memory
- d) a temporary memory

**5. What device is used to work in a graphical interface?**

- a) the printer
- b) scanner
- c) keyboard
- d) mouse

**6. Device used to connect to the Internet using the telephone line:**

- a) touchpad
- b) modem
- c) Personal Digital Assistant
- d) tracer

**7. The first stage in creating a program is:**

- a) design
- b) verification
- c) the update
- d) analysis

**8. The acronym LAN stands for:**

- a) Logical Area Network
- b) Local Area Node
- c) Little Area Network
- d) Local Area Network

**9. What software application is used to create a database?**

- a) Microsoft Word
- b) Microsoft Publisher
- c) Microsoft PowerPoint
- d) Microsoft Access
